

## PROX'N'DRIVE

### LOW POWER CONTACTLESS SMARTCARD READER

#### CONTACTLESS READER/WRITER

Prox'N'Drive is an ISO 14443 and Mifare contactless reader/writer.

Featuring an innovative low power card detection system and designed to be installed behind a windscreen or a window, it is the ideal coupler for car-sharing applications.

#### KEY FEATURES

Being both compact and flexible, Prox'N'Drive is ideal for in-vehicle application. A single cable conveys both single 12V DC power and the RS-232 interface.

The front panel is fully customizable, and shows 3 high-luminosity LEDs for user information.

The low power card detection system make it possible to put both the reader and its host system in deep standby mode until a contactless card, RFID tag or NFC object is waved over the antenna. The reader is customizable with your logo.

#### A FEW TYPICAL APPLICATIONS

- Car-sharing,
- Battery-powered kiosks,
- Active display windows.

#### PRECAUTIONS FOR INSTALLATION

This device is a contactless reader; it uses inductive coupling (magnetic field) to power the cards and communicate with them. Precaution must be taken to keep the reader far from any source of perturbation (e.g. other readers, computers...). Installing the reader near a metal surface (aluminium or steel plate...) will lead to shorter operating distance and increased power consumption. SpringCard has a long experience installing contactless couplers in various kind of devices. Do not hesitate to contact us if you need any assistance.
