

PROX'N'ROLL RFID SCANNER

Quick Start Guide

Thank you for choosing SpringCard !

Prox'N'Roll RFID scanner is a versatile 13.56 MHz RFID scanner. Its USB interface emulates a standard keyboard : no driver installation, no software required!

Prox'N'Roll RFID scanner is highly configurable to read serial number or data from any RFID tag or contactless smartcard.

This document will help you to connect this product.

USING THE PROX'N'ROLL

The SpringCard ProxRunner is seen as a keyboard. Thus you must put your cursor where you want the data to be written.

Next put a card on the reader.

CONFIGURING THE PROX'N'ROLL

Let the Master card on the reader **until the leds blink and the buzzer emits a long pulse.**

To create a Master card, use the UCKI632 which is a complete configuration tool dedicated to RFID Scanners family. With the UCKI632, you could modify the configuration of your RFID scanner as many times as you want.

For more information about the UCKI632, go to SpringCard's UCKI632 product page at www.springcard.com/products/ucki632.html

For more information about RFID Scanner, go to SpringCard's solutions page at www.springcard.com/solutions/rfidscanner.html
