

NFCWizard

Create your own SmartPoster in just a few clicks!

Agenda

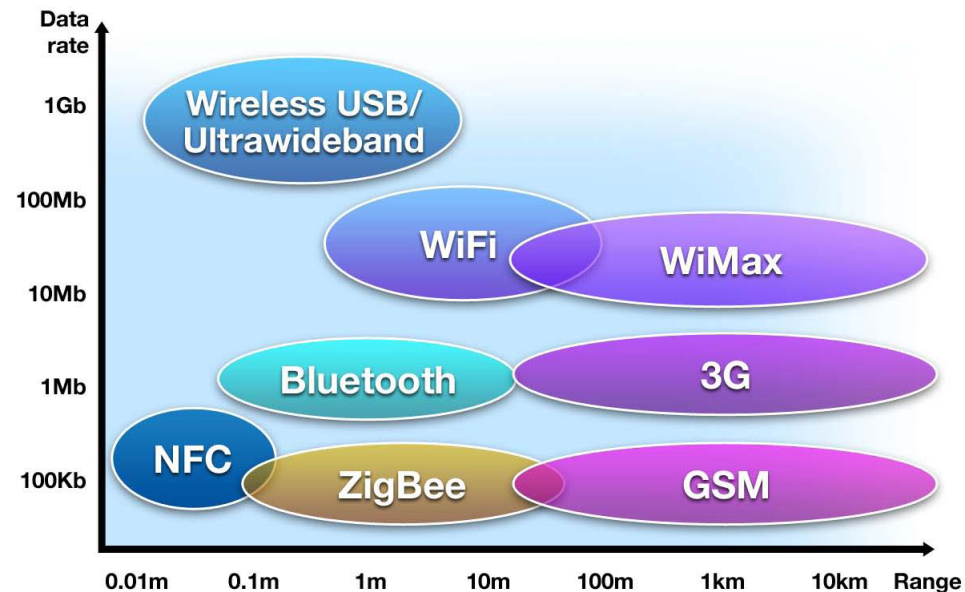

- **What is NFC?**
- **What is a SmartPoster?**
- **What type of tags can I use?**
- **What is NFC Wizard?**
- **Demonstration**
- **Which reader/encoder works with NFCWizard?**

What is NFC?

- **Near Field Communication (NFC)** is a large-scope, multi-purpose 'concept' that aim to federate various technologies enabling **interactions between two electronic devices at short distance (< 10cm)**
- The name **NFC** used to be closely linked to the ISO 14443 world (RFID communication using **inductive coupling** at **13.56MHz**)

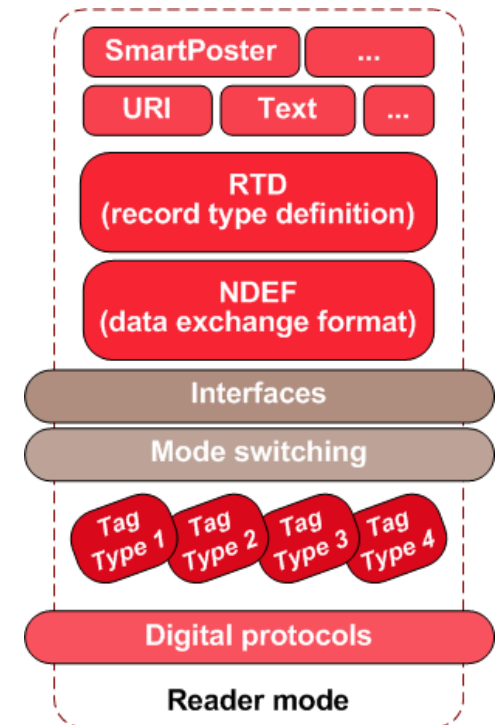

What is NFC? – NFC Tag content

- NDEF : **NFC Data Exchange Format**
- RTD : **Record Type Definition**

- **NFC's NDEF + RTD** architecture defines how an NFC device will **recognize** and **handle** data it finds in a tag:
 - **Recognize:** is this data a NFC-Forum defined message, or just noise? How long is the data? How could I read the data efficiently?
 - **Handle:** what is the content of this message? Is this data NFC genuine? How should it be displayed to the user? which action should I perform?

What is a SmartPoster?

- **A SmartPoster is a specific kind of NFC Tag**
- It has 2 child records:
 - **URI** (Internet address, email address, phone number + SMS text, etc)
 - **Text** (optional): text to be displayed in a user application
- Typical action to be taken by the NFC device: **prompt** (display the Text), **open** the URI (*web browser or whatever relevant application*)

What is a SmartPoster? - Examples

Examples of SmartPosters' Actions :

- ❑ launch a web browser and go to specified URL
- ❑ send an SMS or an email message
- ❑ start downloading interactive content
- ❑ get connected to a Wifi access point

What type of tags can I use?

NFC Type 2 tag

- ISO 14443-A modulation and anti-collision (*up to level 3*)
- Memory structured in 4bytes pages, READ function returns 4 pages, WRITE function updates 1 page
- Optional SECTOR SELECT function if memory > 1 Kb
- No authentication, but memory could be turned read-only (lock)
- Compliant chips: **Mifare UltraLight** (but only 44bytes...) and **Mifare UltraLight C** (140bytes)
- Read **NXP document 130312** for details

What type of tags can I use?

NFC Type 4 tag (to be available soon)

- **Any ISO 7816-4 smart card**
(on top of ISO 14443 A or B level 4 ... or other)
- Compliant chips: **Mifare DESfire**
- Select the NFC-Forum **NFDEF Tag Application**
00 A4 04 00 07 D2 76 00 00 85 01 00
- Select the **Capability container**
00 A4 00 00 02 E1 03
- Read the **CC**
00 B0 *Offset.Hi Offset.Lo Length*
- Select one of the **NDEF files**
00 A4 00 00 02 *FileID.Hi FileID.Lo*
- Read the NDEF field
00 B0 *Offset.Hi Offset.Lo Length*

What is NFCWizard?

NFCWizard is a website that helps you create and read SmartPosters.

NFCWizard uses a small Java applet that runs in your web browser, that uses your PC/SC contactless smartcard reader , to communicate with the NFC Tag to be read or written.

Demonstration : NFCWizard with the Prox'N'Roll

Our PC/SC readers - CSB6 Family

CSB6 – All in one

- Contactless slot
- Contact slot
- 3 SIM/SAM slots

Prox'N'Roll PC/SC

- Contactless Desktop reader
- OEM version available
- attractive design

The CSB6 Family Products are PC/SC readers/writers for PC

PC/SC SDK available for free on our website :

<http://springcard.com/download/find.php?file=pcsc-sdk>

CrazyWriter

- OEM
- Contactless slot
- 2 SIM/SAMs slots

EasyFinger

- Contactless slot
- Contact slot
- Finger Print reader
- 2 SIM/SAM slots (optional)

Product scope – CSB6 Family

CSB6 Family products :

- Proximity products (13.56MHz range)
- Support **USB 2.0 full speed** (12Mbps), and fastest smartcard baud rate (**848kbps**)
- Handle **any ISO 14443 (type A, B and B')** and **ISO 15693** compliant smartcards or tags

Supported contactless cards/tags

- **NXP (Philips) : ICODE1, ICODE-SLI, Mifare Classic and UltraLight, Desfire, ProX, SmartMX,**
- **Texas Instrument : TagIT,**
- **ST MicroElectronics : SR176, SRiX, LRI etc**
- **ASK CTS256B and CTS512B,**
- **HID iClass and Inside PicoTag (serial number only),**
- **MultOS or JavaCard T=CL cards,**
- **Calypso transportation cards,**
- **NFC mobile phones or other NFC-capable objects (tag emulation mode)**
