

CONTACTLESS READER / WRITER FOR POCKET PC

SP-CF & SP-SD

SpringProx-CF, Springprox-CFUP & SpringProx-SD are contactless cards ISO/IEC 14443-A/B readers / writers for Pocket PC.

Product family

Compact Flash

- **SpringProx-CF** is a **contactless reader / writer** usable in any handheld computer (PDA) with a **CompactFlash** slot.
- **SpringProx-CF-UP** is a **contactless reader / writer** usable in any handheld computer (PDA) with a **CompactFlash type II** slot.

SDIO

- **SpringProx-SD** is a **contactless reader / writer** usable in any handheld computer (PDA) with an **SDIO** slot.

Benefits

- Full support of Philips Mifare, DESFire...
- Embedded T=CL protocol, ISO/IEC 14443-A/B compliance from layer 1 to 4.
- Easy installation on the Pocket PC with free download of driver adapted for windows pocket PC 2003, windows mobile 2005
- Unified SpringProx API

A few applications...

- ✓ Acces control
- ✓ Electronical documents (Driving licence, ID card,...)
- ✓ Strong authentication
- ✓ Digital signature
- ✓ Transportation ticket issuing (train, suburb, bus...)
- ✓ ...

Development kit

- The **SpringProx Starter Kit** assists developers in writing contactless applications for Windows Mobile handhelds (PocketPC).
- Thanks to the unified **SpringProx API**, it is really easy to write code that will run either with SpringProx on the PocketPC device, or with CSB4 on a desktop or laptop computer.

The **SpringProx Starter Kit** includes :

- 1 x SpringProx (SD, CF, CF-UP or RC, depending on actual SRK order code),
- 1 x CSB for PC-based application prototyping (CSB4 or CSB5, USB or serial, depending on actual SRK order code),
- Redistributable SpringProx API binaries (DLL for Windows CE / ARM CPU, and .NET class library),
- Sample softwares source code,
- Development and integration documentation,
- 1-year access to our Developers Technical Support,
- Set of 10 contactless cards
